SCIENTIFIC NOTES.

MALTESE SHEEP .- This well-marked and peullar variety has been introduced into Algeria, and M. de Bray, an agriculturist of that colony, in a paper read before the Agricultural Society of France, expresses the opinion that this curious race has arisen from a cross between a ram and a she-goat.

POTARO FALLS .- Mr. Charles T. Brown of the Geological Survey of Demerara has found a magnificent fall on the Potaro River, hitherto unknown. The river passes over a table land composed of slightly inclined beds of sandstone and conglomerate, 1,375 feet above the level of the sea, and descends perpendicularly in an un-broken fall of about 200 feet. The river is about 300 feet wide, and its greatest depth is from 10 to 15 feet.

FIXING DYES.-Mr. Kipping of Manchester, England, has a new process of fixing dyes. He dissolves
20 ounces of gelatine in water and adds three ounces of
bichromate of potash. This is done in a dark room. The
coloring matter is then added and the goods submitted
thereto, after which they are exposed to the action of
light; the pirment thus becomes insoluble in water and
the color is fast.

TO REMOVE NITRATE OF SILVER STAINS.— Grimm states in a German journal that chloride of copper completely removes in the constant and colored cotton cloth. It should afterward be washed with hyposulphile of seda, and then thoroughly washed with water. Such stains are more effectually removed from white cotton or line cloth, by applying to it a dilute solution of permanganute of potash and hydrochloric solid, which is to be followed by washing with hyposulphite of sodisand plain water. This process renders the use of the highly poisonous cyanide of potassium unspeccessary.

TO PREVENT WATER FROM BECOMING PUTRID —As water containing no air does not become putrid, Mr. Runge uses wrought-iron to free water from the dis-

DUALIN.—This name is given by Carl Dittmar

To PROTECT WOOD,-Dr. Reinsch recommends the following plan: The wood, unplaned, is to be placed for 24 hours in a liquid composed of one part of conplaced for 24 hours in a liquid composed of one part of com-centrated silicate of potash (water-glass) and three parts of pure water. After being removed and dried for several days the wood is again souked in this liquid, and, after being again dried, is painted over with a mixture of one part of cement and four parts of the above liquid. When the first coat is dry, the painting should be repeated twice. The paint mixture should only be made up in small quantities as it rapidly becomes hard and dry. Wood thus treated becomes inflammable and does not deen under sround.

The week closes upon a money market of remarkable case and plenty, and to first-class houses money is offered at any rate of interest at which they will take it. On Governments, call loans have been offered from 224 per cent, and on stocks and bonds at from 425 per cent. We quote commercial paper: Prime 60 days acceptances pass at four months at 7284, and six months at 72810 per cent; prime single names, 60 days, are quoted at 728, and four to six months at 8212 per cent; bankers' 60 days paper is quoted at 7 per cent, and three to four months at 7@10 per cent.

The advance on our bends in London and the weakness in gold have advanced the price of Government bonds, and they are now held unusually firm, with very small amounts offered in the market. At the morning call of the Stock Exchange, the 5-20s of 1862, coupon, were quoted at 1111; do. of 1867, 1094. At the second call, 68

of 1881, 111‡; 5-20s of 1865, 110‡; do. of 1867, 100≱. The market for [State railroad and miscellaneous bonds is decidedly dull and almost entirely inactive. North Carolina 68, new, 29; Louisiana 68, 68; New York State bounty loan, 107; Central [Pacific Railroad floods, 85; Union Pacific, 814. At the Second Board, Tennessee 68, 62k; do. new, 60@591.

The stock market continues unusually dull, with prices firm. Most of the large operators are out of town, and "the street" looks deserted. The tone of the market to day is strong. New-York Central and Hudson, 931 @931; do. Certificates, 891; Erie, 21; Reading, 96 3 954; St. Louis and Iron Mountain, 48; Lake Shore, 911 @ 902; Milwaukee and St. Paul, 59§; Chicago and North-Western, 82§; do. preferred, 85; Rock Island, 113§; Toledo and Wabash, 48§; Onto and Mississippi, 332; Hannibal and St. Joseph, 107. After the second call, in the Long Room, prices feil off

The Bank Statement is not regarded as a favorable one. It shows shipments of specie abroad, and a check-ing of Western banks for currency for the purpose of While this shows a loss in the Bank Statement here, it shows a gain to the country in the distribution of money and in the increase of railway receipts. The Bank State ment shows as follows: Decrease in loans, \$757,600; decrease in specie, \$3,791,798; decrease in legal-tenders, \$2,559,763; decrease in deposits, \$6,736,461; decrease in circulation, \$62,389. This leaves of deposits in bank, \$220. 819,300; and of specie, \$26,472,092; and of legal-tenders, \$52,287,188. On the 7th of August, 1869, the city banks held of deposits, \$200,220,008; and of specie, \$26,003,925; and of legal-tenders, \$56,066,834; and money was on call from 627 per cent. The banks have \$20,599,292 more of deposits now than on the 7th of August, 1870

The large loss in legal tenders is ascribed to the fact—the following of the fact and One-hundred-and-twenty-fourth-st.

Harlem September 19, and on Fifth-ave. September 21. that deposits have been withdrawn from the old banks—at low prices: bank, which started on the first instant, and which is not yet a member of the Clearing House Association. The Gold Room to-day has been dull, and sales generally

speculative. The highest sale, 1213, is a below the highest price yesterday. On the 6th of July last, gold was 1111 the highest point, to-day 1212, an advance of 94 per cent. August 6, 1869, gold was 1361—151 per cent above the price to-day. Gold was quoted at 10 a. m., 1211; 10:10, 1211; 10:40, 121; 11:09, 1214; 11:26, 1204; 11:56, 121; 12:07, 1204; 12:16, 121; 1:15, 121; 2:15, 121; 3, closed at 121;. Foreign exchange continues dull and nominal. Such ales as are made are a fraction below the quoted rates, which are as follows:
